

Tools and Artifacts

Prof. Dr. Dirk Riehle

Friedrich-Alexander University Erlangen-Nürnberg

AMOS B02

Licensed under [CC BY 4.0 International](#)

Agenda

1. Code repository
2. Project features
3. Kanban board
4. Planning docs

Project Management

- The AMOS Project directive is **simplify, simplify, simplify!**
 - GitHub repository, issues, and project for software development
 - Google Sheets for high-level product and process management
 - Teams may add additional tools at their discretion (and own risk)

The Wahlzeit / Flowers Example

1. Code Repository

GitHub Code Repository Set-up

- GitHub account
 - Please create a GitHub account if you don't have one yet
 - Send your account name (handle) to team coach
- GitHub project
 - The team coach will create a team for you and invite you to a code repository
 - You will all be owners of the code repository, initially; change as you see fit
- Your project name will be amos-ss20xx-fabulous-project
 - It will be public (read access to world)
 - It uses the MIT license
- You can collaborate as you see fit (but should agree first)

2. Project Features

Feature and User Story

- Definition of **feature**
 - A distinguishing characteristic of a software item (for example, performance, portability, functionality) (IEEE 829)
- Definition of **user story**
 - A description mechanism for a software feature used to create a shared understanding of the feature; follows an established pattern
 - The description pattern is: As a “**user role**”, I need “**a function**”, so that “**I get business value**” where the parts in quotation marks are substituted
- Example user stories
 - Rate-a-photo: As a **visitor**, I can **rate a photo with a numerical value 1-10**, so that **I can share my opinion about the photo**.
 - Tell-a-friend: As a **user**, I need **a function to tell a friend about a flower photo**, so that **I can share my passion for flowers**.

Types of Issues

- Features
 - New functional improvements
- Refactorings
 - Behavior-preserving improvements
- Bugs
 - Fixes to malfunctioning

Quality Criteria for Features

I ndependent: Features should be independent of each other.

Negotiable: A feature is man-made, not cast in stone.

V aluable: Every feature should have business value.

E stimatable: A feature should be precise so that size can be estimated.

S mall: A feature should be small enough for one iteration.

T estable: A feature should have testable success criteria.

GitHub Issues Set-up

- GitHub issue template
 - Please create a template for feature requests
 - The template should contain fields for
 - Short name (already preset as title field)
 - Short description (using user story)
 - Acceptance criteria (to test for fulfillment)
 - Definition of done (from week 5 on)
- Create labels for features sizes
 - Est. size = X for estimated sizes
 - Set during sprint planning
 - Real size = Y for actual size
 - Set during sprint review
 - Use escalating colors
- Feel free to add more templates

Issue: Feature Request

Suggest new feature (using user story)

User story

1. As a {},
2. I want / need {}
3. So that {}

Acceptance criteria

- Criterion 1
- Criterion 2
- ...

Definition of done

- Added after week 5
- Always the same

Optional additional items

Issue default title:

Assignees:

Labels:

The Tell a Friend Feature 1 / 2

Tell a friend #129

dirkriehle opened this issue 2 days ago · 0 comments

dirkriehle commented 2 days ago • edited ▾

Owner

User story

1. As a guest
2. I can email a friend about a photo
3. So that I can share my passion

Acceptance criteria

- After hitting OK, an email is sent
- After hitting Cancel, no email is sent
- The next page is the main page

Definition of done

To be defined week 5 onwards.

3. Kanban Board

The Feature Life-Cycle

Product Backlog and Product Backlog Entry

- **Product backlog entry**
 - A named, identifiable, and prioritized feature, bug, or refactoring
- **Product backlog**
 - An incomplete, evolving list of features prioritized by business value
- Purpose of product backlog
 - To know what's coming up next

Sprint Backlog and Sprint Backlog Entry

- **Sprint backlog entry**
 - A high-quality product backlog entry that
 - has been estimated for size and committed-to to being implemented by the software developers
- **Sprint backlog**
 - A list of sprint backlog entries that
 - the software developers have committed to implementing in the current sprint
- Purpose of sprint backlog
 - To know at any time what to do in the current sprint
 - To serve for task allocation between developers

Feature Archive

- **Feature archive**
 - All issues that have been implemented
 - All issues contain the original size estimation
 - All issues contain the real (after-implementation) size
- Purpose of feature archive
 - To serve as a summary of product features
 - To allow lookup of history of development

GitHub Project Set-up

- GitHub project
 - Please create a project (board) for backlogs
 - The board should have five columns
 1. Product backlog (for new unscheduled features)
 2. Sprint backlog (for features to-be-done)
 3. In progress (for features currently in work)
 4. Awaiting review (for features to be reviewed)
 5. Feature archive (for finished features)
- Connect issues with project

4. Planning Documents

Strategic Planning Set-up

- Strategic planning uses Google Sheets
 - Please copy the planning documents template: <http://goo.gl/Brc0Q>
 - Share your copy with the team and the coach
- Wahlzeit / Flowers example
 - Planning artifacts: <http://bit.ly/3qitBF1>

Strategic Planning Document

#	Artifact Name	Artifact Purpose
1	Project Data	Provides basic project data
2	Project Team	Shows project team and static roles
3	Team contract	Shows team contract
4	Role Assignments	Tracks role assignment
5	Product Goal	Provides product vision and project mission
6	Product Glossary	Provides domain terminology of project
7	Mid-project Release Tracking	Tracks mid-term release sprints
8	Final Project Release Planning	Plans and tracks final project release sprints
9	Impediments Backlog	Tracks process problems and solutions
10	Definition of Done	Provides decision criteria for “done”
11	Documentation	Provides additional documentation of product
12	Bill of Materials	Lists all third-party components
13	Planning Poker	Provides simple tool for planning poker

1. Project Data

Project Name	Flowers (Wahlzeit)
Production system (if any)	https://wahlzeit.com/flowers
Test system (if any)	...
Github repository	https://github.com/dirkriehle/wahlzeit/
GitHub kanban board (project)	https://github.com/dirkriehle/wahlzeit/projects/2
Team T-shirt (white)	...
Team T-shirt (black)	...
Additional materials	...

1. Project Data (Explanation)

- Definition
 - A collection of relevant (starting point) links
- Purpose
 - To simplify navigation
- Production and system
 - Deployment scenarios depend on project
- GitHub repository
 - Required
- CI tooling
 - Optional

2. Project Team

Last Name	First Name	GitHub User Name	Email Address
Riehle	Dirk	dirkriehle	dirk.riehle@fau.de
Schwarz	Georg	georg-schwarz	georg.schwarz@fau.de
Bauer	Andi	andreas-bauer	andi.bauer@fau.de
Hahmann	Lukas	tfrdidi	lukas.hahmann@fau.de
Wagemann	Hendrik	Henny022	hendrik.wagemann@fau.de
Metzig	Aron	knusperkrone	aron.metzig@fau.de
Dohrn	Hannes	hannesd	hannes.dohrn@fau.de

2. Project Team (Explanation)

- Definition
 - The list of team members and their contact information
- Purpose
 - To make it easy to contact individuals or the whole team
- Pragmatics
 - Feel free to add other information, e.g. Skype ID

3. Team Contract

Goals	Achieve our defined project mission
	Foster and atmosphere of learning
Meeting norms	Everyone shows up on-time
	We do not interrupt each other
Working norms	Everyone contributes regularly
	We value quality over quantity
Coordination norms	Every job has a responsible person
	We volunteer for jobs (no assignment)
Communication norms	We check Slack at least once a day
	We follow the Chatham house rules
Consideration norms	We discuss disagreement openly
	We vote for a final resolution
Cont. improvement norms	We jointly review the happiness index
	You must raise insufficient quality issues
Rewards	We high-five a successful sprint release
	We celebrate a successful release with cookies
Sanctions	You must raise clear violations of the team contract
	We apologize by bringing cookies

3. Team Contract (Explanation) [1]

- Definition
 - A uniform agreement of the team as to which goals, norms, rewards, and sanctions they play by
- Purpose
 - To have a defined and agreed-upon way of operating as a team

[1] <https://oss.cs.fau.de/teaching/course-resources/student-team-contract/>

4. Role Assignments

#	Meeting Day	Comment	Coach	Product Owner	Software Developer	Scrum Master	Release Manager
1	2021-04-14			Dirk Riehle	Everyone else	N/A	N/A
2	2021-04-21			Dirk Riehle	Everyone else	Dirk Riehle	Dirk Riehle
3	2021-04-28			Dirk Riehle	Everyone else	Dirk Riehle	Dirk Riehle
4	2021-05-05			Dirk Riehle	Everyone else	Dirk Riehle	Dirk Riehle
5	2021-05-12			Dirk Riehle	Everyone else	Dirk Riehle	Dirk Riehle
6	2021-05-19		
7	2021-05-26	Mid-term due					
8	2021-06-02						
9	2021-06-09						
10	2021-06-16						
11	2021-06-23						
12	2021-06-30						
13	2021-07-07						
14	2021-07-14	Demo day!					
15	2021-07-21	Retrospective					

4. Role Assignments (Explanation)

- Definition
 - A week-by-week assignment of roles to team members
- Purpose
 - To have a plan and history of role assignments so everyone knows their job
- Pragmatics
 - Please plan out the project at start of course
 - Feel free to add roles beyond the four required ones
- **Use the same week numbers as in the Course schedule**
 - **Week 1 starts with the first lecture**
 - **Week 1 also starts the first sprint**

5. Product Goal

Product Vision	Project Mission
<p>The Flowers social network helps flower enthusiasts world-wide to connect with each other and enjoy following their favorite hobby online. Centered on showing and rating favorite flower photos, it inspires growing and presenting ever more beautiful flowers. With a highly engaged user community, Flowers is the best place for producers and sellers of gardening supply to reach out to customers and engage with them. Such engagement involves understanding flower enthusiasts' needs around gardening supplies and selling to them.</p>	<p>The mission of this project is to create an MVP for Wahlzeit with the Flowers extension. Core functionality will be showing and rating photos, basic user management, case management, and minimal system administration.</p>

5. Product Goal (Vision and Mission)

- Definition of product vision
 - A product vision communicates
 - The main purpose and core functionality of the product
 - The value the main stakeholders receive
 - It is inspiring, timeless, focused and the final arbiter
- Definition of project mission
 - A project mission summarizes
 - What the project wants to achieve
 - Within the project time-frame
- Purpose
 - To succinctly explain product and project
 - To guide when prioritizing features

6. Product Glossary

Term	Definition
Average Photo Rating	Synonym for overall photo rating.
Individual Photo Rating	A numerical value 1..10 that a visitor applies to a photo.
Overall Photo Rating	A photo rating is a numerical value that represents the community's ranking of the photo in question. Over time, a photo accumulates a large number of individual photo ratings.
Photo	A photo is a flower photo that has been uploaded (and is owned) by a system user. A photo has a status that determines its accessibility.
Photo Sharing Policy	Flowers has a photo sharing policy. The policy determines what an acceptable photo is. Photos are unacceptable if they are unrelated to the current flower.
Photo status	A photo may be visible to the world or invisible (by choice of owner). Photos may be flagged for violating Flowers' photo sharing policies. Flowers moderators can change the status of a photo.
Photo Tag	A photo tag is a label that has been applied to a photo by its owner. They have no further semantics beyond the actual text.
Single Photo Rating	Synonym for individual photo rating.
System Administrator	A system administrator is a system moderator with additional administration functionality. He or she can reboot the system.
System Moderator	A system moderator is a system user with access to additional moderation functionality. He or she can moderate photos.
System User	A system user is a (human) user of the system who has a user account and is logged into that account. A user can upload and maintain photos.
System Visitor	A system visitor is (human) user of the system. A visitor has access to all public functionality that does not require a login.
Tag	Shorthand for photo tag.
User	Shorthand for system user.

6. Product Glossary (Explanation)

- Definition
 - Is an alphabetically ordered list of terms and their definition
- Purpose
 - To provide key domain terminology (shared vocabulary) of project
 - Is a simplified form of a domain model accessible to everyone
- Term
 - A (possibly qualified) noun determining the concept to be defined
- Term definition
 - The definition of the referenced term
 - A base definition is a declarative statement of the form X is a X*
 - Other forms of definitions are synonyms, short-hands, etc.

7. Mid-Project Release Tracking

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
1	Visitor	Self-Admin			21		21	
			Deliver first increment of running software					
			Register	8		8		
			Login	5		5		
			Logout	3		3		
			Reset Password	5		5		
2	User	Self-Admin			21		23	
			Deliver increment with basic user handling					
			Prompt Basic Profile	5		5		
			Change Basic Profile	5		5		
			Change Password	3		5		
			Upload Photo	8		8		
3	Photo	Management			21			
			Deliver increment with basic photo handling					
			Browse Photo Portfolio	8				
			Select Photo	5				
			Change Photo Data	3				
			Delete Photo	5				
4	...							

7. Mid-Project Release Tracking (Explanation)

- Definition
 - A prioritized list of features for a product release
- Purpose
 - To predict the content of the upcoming product release
- Pragmatics
 - Has been estimated by developers, validated by historic data
 - Is a living document, that is, gets adjusted after each sprint

8. Final Project Release Planning and Tracking

[illegible]

8. Final Project Release Planning and Tracking (Explanation)

- Like mid-project release tracking, but with added planning

9. Impediments Backlog

[illegible]

9. Impediments Backlog (Explanation)

- Definition
 - A list of current and historic impediments to process
- Purpose
 - To know at any time the current impediments
 - To see whether any impediments keep recurring
- Pragmatics
 - It names the Scrum master responsible for resolution
 - It provides the solution found, if any

10. Definition of Done

[illegible]

10. Definition of Done (Explanation)

- Definition
 - Is a check list of decision criteria to determine status of “done”
- Purpose
 - To be consistent about what “done” means
- Pragmatics
 - Definitions of “done” (DoD) require team consensus
 - There are many such decisions, hence many DoDs needed
 - At a minimum, at the proper time, the team should have a
 - DoD for features
 - DoD for sprint release
 - DoD for product release

11. Documentation

Type	Link / reference
User manual	https://github.com/dirkriehle/wahlzeit/docs
Developer documentation	https://github.com/dirkriehle/wahlzeit/docs

11. Documentation (Explanation)

- Definition
 - The product documentation (where to find what)

12. Bill of Materials

#	Context	Name	Version	License	Comment
1	com.fasterxml.jackson.core	jackson-annotations	2.9.5	Apache-2.0	
2	com.fasterxml.jackson.core	jackson-core	2.9.5	Apache-2.0	
3	com.fasterxml.jackson.core	jackson-databind	2.9.5	Apache-2.0	
4	com.fasterxml.jackson.dataformat	jackson-dataformat-xml	2.8.10	Apache-2.0	
5	com.fasterxml.jackson.dataformat	jackson-dataformat-yaml	2.9.5	Apache-2.0	
6	com.fasterxml.jackson.datatype	jackson-datatype-guava	2.9.5	Apache-2.0	
7	com.fasterxml.jackson.datatype	jackson-datatype-jdk8	2.9.5	Apache-2.0

15	com.fasterxml.woodstox	woodstox-core	5.0.3	Apache-2.0	
16	
17					
18					
19					

12. Bill of Materials (Explanation)

- Definition
 - A list of items (“materials”) included in the project
 - Items typically mean open source libraries
- Purpose
 - To maintain an overview of “what’s the box”
- Pragmatics
 - Please lists all third-party components used by the product
 - List only those used directly; no need to recursively unpack
 - In case of open source components, also list their license

13. Planning Poker

Last Name	First Name	Value					
Riehle	Dirk	5		4.29	NOK		
Schwarz	Georg	2					
Bauer	Andi	5					
Hahmann	Lukas	5					
Wagemann	Hendrik	5		0	No effort		
Metzig	Aron	5		1	Minimal effort		
Dohrn	Hannes	3		2	Small effort		
				3	Medium effort		
				5	Large effort		
				8	Very large effort		
				13	Too large effort		

Weekly Checklist for Artifacts

- Software product
 - Tagged, testable, deployable software code base and product
- Planning documents
 - Clean kanban board, release planning, additional information
- Process improvement
 - Impediments documented; happiness index survey taken

Thank you! Questions?
