# The AMOS Demo Day

- The demo day is the final day of the course
  - The demo day is organized as a **fair** (“Messe”)
  - Student teams show the results of their project
  - Audience are industry partners and fellow students
- After the opening, everything runs in parallel

# AMOS Demo Day Time-Line

Time	Location	Agenda / Tasks
09:30-10:15	Demo rooms	Set-up and test of demo room
10:15-10:25	Plenum	Welcome address by Prof. Riehle
10:25-10:35	Plenum	One slide presentation by each team
10:40-11:40	Demo rooms	Four demo sessions of 15min. each
11:40-11:45	Plenum	Closing remarks by Prof. Riehle
11:45-open	Demo rooms	Open discussion demo rooms

# Presentation Booth / Demo Room

- In “normal” times (not Corona crisis)
  - Students are given a “demo booth”
  - The booth is a table plus pinboards
  - Students demo their work at this table
  - Students explain their work using the posters
  - Students can create additional materials
- In times of the Corona crisis
  - Students are given a virtual demo room
  - Students provide a back-up video
  - Students demo their work in this room
  - Students explain their work using slides
  - Students can create additional materials

# Explanatory Posters / Slide Deck

- In “normal” times (not Corona crisis)
  - One product management poster with
    - Project and team name, team logo
    - Short project description
    - Key use cases
  - One software development poster with
    - Software architecture
    - Employed technology
    - Tooling and processes
- In times of the Corona crisis
  - Create a slide deck with
    - One product management slide
    - One software development slide
    - One team photo slide (can be screenshot)
  - Content like in normal times
    - But landscape, not portrait format

Personalfragebogen 2.0\* is a personal data management software solution, supporting companies of any size in hiring new employees more efficiently.

The product improves the hiring process by automating the collection of personal data during the hiring procedure, and provides aid in managing the collected data.

*Demo Day*  
**Friedrich-Alexander Universität  
Erlangen**  
**Wednesday, 15 July 2015 10.15-11.45**

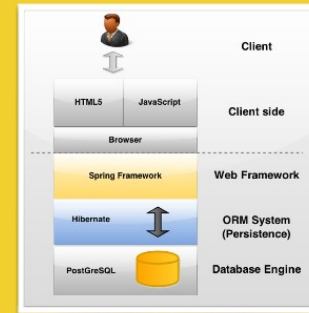

\*Personalfragebogen 2.0 is a joint project between FAU's OSR Group and DATEV eG.

## Personalfragebogen 2.0

*Personnel Questionnaire Automation*

### Software Architecture

### Technology

Name	Function
Spring Framework (4.1.6)	Java based Web Framework
Java SE (7u79)	Fundamental Platform
HTML5	Client-side core technology
Selenium (2.45.0)	UI Testing/Integration Testing
JUnit (4.12)	Java Unit Testing Framework
Hibernate ORM (4.3.9)	ORM System for persistence
PostgreSQL (9.4.1)	Database Management System
Tomcat 7.0.61	For local deployment

\*Personalfragebogen 2.0 is a joint project between FAU's OSR Group and DATEV eG.

# Use of Corporate Identities

- Please use university logo
- Please use your team logo
- Please use industry partner logo, but ask first

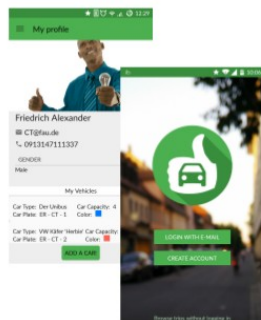

# CroudTrip!

sponsored by Elektrotbit

The CroudTrip! application wants to revolutionize the car-ride-sharing market with its easy, user-friendly and highly automated way of organizing shared Trips!

## The Product

- Offer and join shared Trips at short-notice!
- For drivers: Easily find passengers on the way you are going anyway ... and earn money with it!
- For passengers: Reach your destination comfortably!
- We will automatically match you to the best offer in real-time!
- Simply check-in and check-out of your Trips using NFC on your device!
- No direct Trips? No problem - Join a SuperTrip! with multiple drivers!

## The Concept

### SuperTrip!

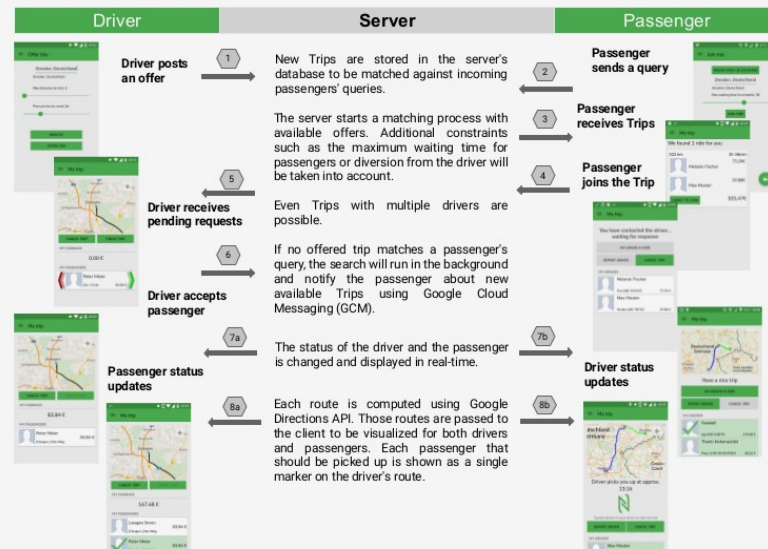

- Combine multiple offered routes to serve passengers even if there is no direct connection available
- Find routes which can pick up a passenger from his start position or drive to his final destination
- Subdivide those routes, compute the closest pair of those waypoints and use it as a "connection point"
- If the distance of the closest pair is too large, start a recursive matching process with these two waypoints

### Multiple Passengers

- Match multiple passengers with one driver who will pick them up and bring them to their destinations in an optimal order
- Optimal order is constrained by given internal order of each waypoint pair, because each passenger has to be picked up before the driver reaches his destination location
- Compute optimal order by solving the Travelling Salesman Problem via Brute Force (max. 4 passengers)

## The Interactions

## The Process

Total Messages  
27% #channels, 1% groups, 72% DMs

- Total # of story points: 370
- Development Speed: 30.9
- 13.23% of total effort used for bugfixing

- Slack as main communication tool
- Integrations for Travis CI, Github and Crashlytics

- Total # of Commits: 727
- Lines of Java Code: 15362
- Lines of Comments: 3938

### The Team

### The Sponsor

### The University

# Presentation Table

- In “normal” times (not Corona crisis)
  - Mandatory
    - Bring a laptop to demo your project
    - Bring anything else necessary
  - Optional
    - Be creative, do what works!
    - The goal is to explain your project
- In times of the Corona crisis
  - Prepare for online presentation

# Demo Preparation

- Dos
  - Have a clean user interface
  - Use domain terminology and examples
    - In the user interface (labels, titles)
    - In the stories you tell
  - Have a story to tell, for example,
    - A day in the life of ...
    - A workflow example
  - Make the demo (data) re-entrant
    - You will have to start over several times
    - Always want to start at the same point
- Don'ts
  - Use “test” or “help” as labels
  - Not follow the advice on the left

# Demo Execution

- Have two people at the presentation booth / virtual demo room
  - One talks to people in general
  - One demos to people

# Thank you! Questions?
